

Landfill Gas Infrastructure Project Underway

February 18, 2020

MURFREESBORO, Tenn. (Feb. 18, 2020). At Middle Point Landfill, we strive to be a responsible operator and good neighbor. This includes keeping you informed of ongoing landfill enhancements and infrastructure projects.

Our team takes considerable measures to mitigate the potential for off-site odor from the Landfill. Along with proper daily cover, odor misting systems and other standard operational practices, we maintain a comprehensive gas collection and control system to capture gas, which is a byproduct of waste decomposition. We are currently installing additional landfill gas infrastructure in a disposal cell in the southeast portion of the Landfill. We anticipate completing installation by early March, and we will keep you updated on our progress.

During this gas infrastructure installation project, there could be the potential for off-site odor. If you detect odor you believe is attributable to the Landfill, please contact us at (615) 782-5500, and we will promptly investigate. We appreciate your understanding and patience.
